Team 3 review by Team 4

Good: -Best intro so far. Very well done!
  - Objectives are complete and good.
  - Interfaces are good (but don't
    forget you're going to have to
    implement all this!)

Bad: -Use words instead of numbers
    in intro (ex: two instead of 2)

  - Diagram could use larger text.
    Inputs/Outputs of diagram don't always
    make sense. (ex: what is the
    CGC outputting to the camera
    network?)

  - Note: tracking all users with
    GPS token is going to
    make implementation and
    simulation very difficult.
    Cool idea but you may want
    to drop it.

  - Section 5.1 Protocols is not well
    defined and is not mentioned in
    definition of terms.

Overall: This is a very good document but this is going to be impossible to implement in two weeks.
