Software Architecture Design (SAD)

1. Introduction

   - *project goals and purpose of this document*

2. Design Overview

   - *design approach*

   - *design diagram including all external interfaces*

   - *diagram explanation*

3. Component Specifications

   - *logical view*

4. Sample Use Case

   - *processing scenario illustrating the execution process*

5. Design Constraints

   - *new constraints introduced or refined at design time*

   - *implementation directives*

6. Definition of terms
